

☑ Agile Software Development

☑ What is Agile?

- Agile is the ability to create and respond to change.
- It is a way of dealing with, and ultimately succeeding in, an uncertain and confused environment

● No Title

- Agile software development is an umbrella term for a set of frameworks and practices based on the values and principles
- Agile software development is more than frameworks such as Scrum, Extreme Programming, or Feature-Driven Development (FDD).
- collaboration and the self-organizing team.
- Agile is a Mindset
